

Is Your Dog Showing Signs of

Osteoarthritis (OA) Pain?

If you've noticed the following changes in your dog's behavior, it could be from OA pain—a chronic condition that can impact how your dog moves and feels.

Limping after exercise

Lagging behind on walks

Slow to rise

Difficulty jumping

Feeling stiff

Difficulty with stairs

If you think your dog is showing signs of OA pain, fill out the [Canine OA Pain Checklist quiz](#) and schedule a visit to share the results with us.
